In the response to the applicants arguments and amendment dated 3/14/05 directed toward an indicator means and counter which counts a time interval before activation of said motor, the examiner draws the applicant attention to col. 7, lines 40-48. Col. 7 lines 40-48 disclose a device including a "delay and set of times," then start. The panel has the capability of showing a number of default jumps and different levels of difficulty.

Col. 7, lines 66-67 discloses " a means of sound, visual, and/or vibration indicator to tell a user when to jump in."

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 and 11-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stevens in view of Reid et al.

Claims 10 and 20-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rudell et al in view of Reid.

Claims 1-31 are rejected for the same reasons as set forth in the rejection of the claims in the office action dated 12/10/04 and further in view of the disclosure of Reid, Col. 7, lines 66-67 and 40-48.

Applicant's arguments filed 3/14/05 have been fully considered but they are not persuasive. The limitation add in the newly submitted amendment is broadly disclosed by the prior art reference of Reid et al, Col. 7.
